

On April 4th and 5th Severino Trucking (NH DOT contractor) will put South Bound ramp traffic from Route 4 onto the newly paved and striped widening behind the DMV. This will push them over allowing for the South Bound Route 16 mainline traffic to be moved West as well. The April 7th North Bound traffic switch will follow.

The following changes will take place between April 7th and the overnight hours of April 8th:

The first change will be the closing of the North Bound Exit 5 **off** ramp to Hilton Park. We plan to close this ramp on April 7th. This ramp will be closed indefinitely as part of the ultimate construction design.

Closing of the North Bound Exit 6 **on** ramp from Dover Point Road East. This too will be permanently closed per the design.

North Bound main line Route 16 traffic will come over the Little Bay Bridge in their current configuration and once off the bridge, they will have a gradual taper to the left onto the current South Bound lanes. They will stay on this side until the Route 4 overpass where they will then cross back over to the existing North Bound lanes leading to the toll plaza.
